

EsterilSol Small Grants Program
Field Implementation Track
Saturday, April 10, 2010

I am very supportive for use EsterilSol. The way forward to stray reduction and rabies eradication.... My big question is, how can we make use of this great intervention? ... We need your help in this regard to help identify supporters to our cause.

Please help us to help the ever increasing stray population in our country. We have surgically sterilized more than 11,000 dogs. We could do more with EsterilSol for lesser amount.
—Dr. Gudush Jalloh with the Sierra Leone Animal Welfare Society

I've been living in Panajachel, Guatemala for over two years and volunteer and consult with several animal welfare groups. How can the new organization I am a part of developing get in on the trials with EsterilSol? Is it possible to bring it to the Lake Atitlan area and partner with us?

Anxious to be more effective for the animals,
—Selaine d'Ambrosi, Ayuda

My name is Liliana Sierra and I work for an animal rights group in Cali, Colombia. We have learned from an organization in Mexico that there is an alternative way to surgery to Neuter male dogs through an injection that has already been approved in the US and in Mexico. I found your email on the internet and I will like to know if you have any information about this topic. Thank you very much.

—Liliana Sierra, Sentir Animal

Two Primary Goals

Help organizations that can be more effective and/or efficient by using EsterilSol

Learn more about EsterilSol's use

Overview of the EsterilSol Small Grants Program
